

VOCAL UNITY

Tori Postma

Holding your instrument

Breathing for Support

Breathing for Resonance

Singing in the same space

Matching lyrics Vowels and consonants

Accuracy (maintain key center)

Sing for the RING

Start with 1st phrase and work entire song

1. All sing unison on DO with current interpretation
2. Each part sings their part against DO
3. Each possible duet against DO
4. Each trio against DO
5. All together again

Make sure to focus on diction, synch, connection and resonance throughout the exercise.

This exercise will create singing in the same space, tuning to the tonal center, more tone flow, matched vowels and a more energized tone.....a BETTER BARBERSHOP SOUND

- Good Vocal Production is the key to everything!
- Breathing, alignment, support, and energy are fundamental to all singing.
- All singers must commit to singing the right notes, the right words, the right intervals, the right rhythms,-- EVERY time.
- Every performance of a song needs a musical plan and each singer must know and rehearse the plan, performing it with accuracy and precision consistently.
- Then every singer must sing with energy in the body, face, and voice, all in an effort to create a better quality sound.
